Foreword

The Dutch Automotive industry and mobility sector operates at a high level: this is only possible by cooperation. International cooperation is crucial in this respect. Almost 90% of the value created by the Dutch Automotive industry is exported. The industry is in the midst of a large-scale transition in which sustainability and digitalisation are the central themes: moving towards zero emissions, accidents and delays. These are also the themes that are leading in Europe.

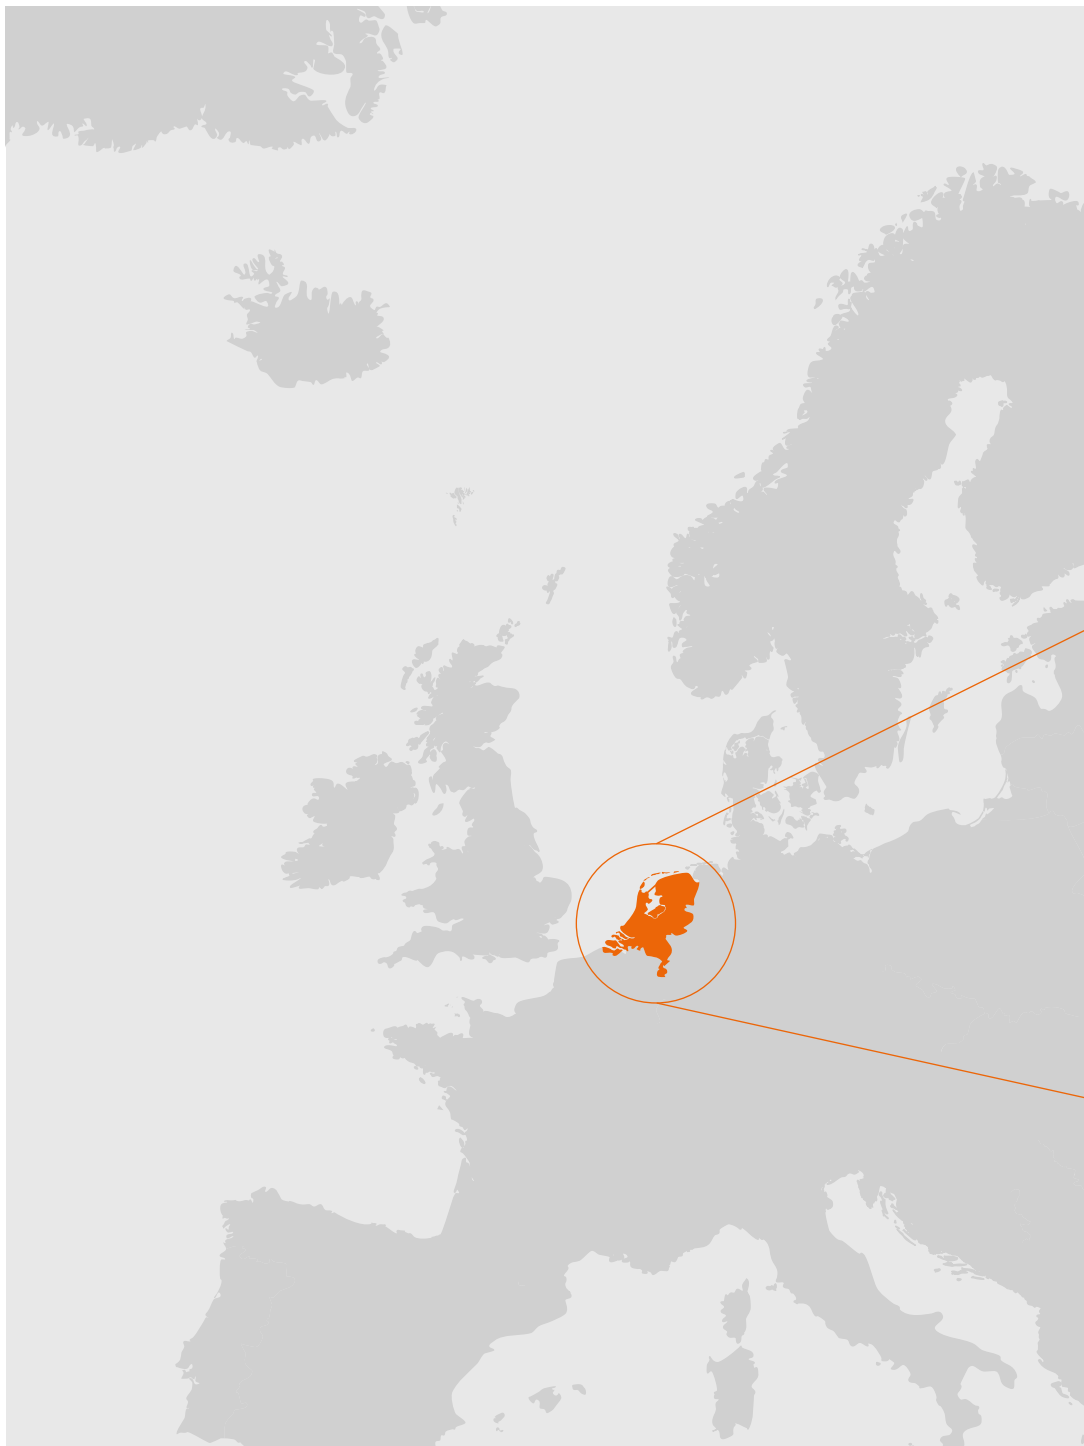

France is an important cooperation and trade partner for the Netherlands. The ecosystems fit well together: France has large OEM and TIER1 companies, the Netherlands mainly TIER2-3-4 parties.

Since 2017, RAI Automotive Industry NL has been running an active program to establish new relationships with French partners and to consolidate and expand existing ones. Equip Auto is one of the actions to achieve our goals: more (innovation) cooperation and more trade. Participating in Equip Auto is therefore not a one-off initiative, but part of a long-term strategic cooperation. I am looking forward to make this event a success, together with our co-exhibitors of our pavilion. Bonne chance!

Company Profiles

Axxor Group

Axxor is one of the leading companies in the production of paper honeycomb. Production takes place in Europe (the Netherlands and Poland) and America on ultramodern production lines developed in-house. This enables us to deliver small to very large volumes in a consistently very high quality and at an excellent price with 100% business continuity.

Wieger Wiegiersma

CEO

+31 38 4600 430

salesNL@axxor.com

We are known for taking a holistic approach to solving our customers' problems, even if a product or process solution does not yet exist.

An example of this is our new sustainable light weight solution for the automotive industry. A solution consisting of sandwich panel that is economically recyclable with a small footprint. In addition to a very low weight and durability, it is also very strong, stone-resistant and easy to process at a low cost. Interesting? Visit us at the NL Pavilion.

Inalfa Roof Systems

Powered by spirit, Driven by innovation

Inalfa Roof Systems creates exceptional in-vehicle experiences for people all over the world. Our goal is to be the number one innovative company in the industry, producing high-quality user-centered roof systems for the automotive industry.

Oliver Reiners

VP Sales Europe

oliver.reiners@inalfa.com

Carlo Rödel

Director Global Sales

carlo.roedel@inalfa.com

As market leader in the design, engineering and manufacturing of automotive roof solutions, Inalfa applies expertise, knowledge and experience in exploring the possibilities of integrating new technologies into the vehicle roof area. Inalfa is a typical system integrator, combining a wide range of technologies from multiple suppliers into one plug and play module that is delivered to the automaker. Inalfa can give added value to the end-user by supporting safety, comfort and health features through its roof system.

Bram Roefs

Global Sales Excellence Leader

bram.roefs@inalfa.com

Having a global footprint with engineering centers and production facilities in Europe, Asia and the Americas, Inalfa delivers roof systems to almost every major car and truck manufacturer in the world.

NRF

For almost 100 years NRF is a leading manufacturer and supplier of cooling products and solutions for the automotive aftermarket, marine, railway and industrial sector. NRF was originally known for manufacturing radiators, but today NRF supplies a wide range of more than 10.000 engine cooling and climate control parts. And now, NRF goes even beyond cooling with the latest introduction of sensors. In our large development and testing facilities, we constantly ensure that you receive the highest quality products.

Due to our strategically located warehouses and customer service centers, we are a global aftermarket player, but a local partner. You can expect a high level of service from us and we speak your language. Every day, NRF products go to customers in more than 80 countries worldwide.

Trescal

The global leader in calibrations

Trescal is the global independent expert in calibration services. Each year, over 70,000 companies, active in the aerospace, automotive, pharmaceutical, chemical, energy, electronics and telecommunication sectors entrust Trescal with their calibration needs!

Automotive & Transport

Car manufacturers and their supply-chains must rely on calibration specialists with global coverage in terms of standard compliance requirements (IATF16949 and ISO/IEC17025) in order to innovate and remain competitive.

Our expertise includes:

- Integration of operational and organisational constraints relating to the automotive industry
- Wide scope of services including laser trackers and CMM calibration
- Complete expertise in current requirements and standards (IATF16949, ISO9001, ISO/IEC17025)

RAI Automotive Industry NL

RAI Automotive Industry NL is the cluster organization of the Dutch automotive industry, mobility sector and related knowledge and education centres with about 200 members.

RAI Automotive Industry NL supports the innovative Dutch automotive sector by profiling and representing the sector, nationally and internationally. An important basis is formed by the national eco system that is part of the innovative Top Sector High Tech Systems & Materials (HTSM), in which industry, education, science and governments parties actively work together.

Innovation

The Netherlands is one of the most innovative countries globally, according to Global Innovation Index (PwC), Automotive Disruption Radar (Roland Berger) and Autonomous Vehicles Readiness Index (KPMG). RAI Automotive Industry NL promotes the enforcement of the international market position of its members and promotes the business climate in The Netherlands by continuously strengthening the Dutch business innovation ecosystem.

Ambition

Zero emissions – Zero congestion – Zero accidents

To realize these ambitions, a number of programs have been established:

- Green Mobility
- Smart Mobility
- Manufacturing & Materials
- Human Capital
- Internationalization
